# API

## AMIODARONE HYDROCHLORIDE

Amiodarone HCl is used to treat life threatening arrhythmias like ventricular tachycardia and fibrillation. It stabilizes heart rhythm, particularly for long term management of atrial fibrillation and during emergencies.

## ADAPALENE

Adapalene is a topical retinoid used for treating acne vulgaris by promoting skin cell turnover and reducing inflammation. It also improves skin texture and reduces fine lines in anti-aging treatments.

## MINOXIDIL

Minoxidil promotes hair regrowth in androgenetic alopecia by increasing blood flow to the scalp and stimulating hair follicles, helping to reduce hair thinning and encourage growth.

## VITAMINS

### VITAMIN B1 (THIAMINE)

Offered for formulations supporting energy metabolism and neurological functions, essential for cellular energy production.

### VITAMIN B6 (PYRIDOXINE)

Available for applications focused on amino acid metabolism, enzymatic reactions, and neurotransmitter synthesis.

## ITOPRIDE

Itopride treats gastrointestinal motility disorders like functional dyspepsia by enhancing gastric motility and reducing symptoms such as bloating, nausea, and discomfort.

## ACYCLOVIR

Acyclovir treats viral infections like herpes simplex and varicella-zoster by inhibiting viral DNA replication, reducing symptoms and the duration of outbreaks.

### VITAMIN B2 (RIBOFLAVIN)

Essential for formulations targeting energy production and cellular function, supporting oxidation-reduction reactions in metabolic pathways.

### VITAMIN B12 (METHYLCOBALAMIN)

Suitable for formulations aimed at red blood cell production, DNA synthesis, and maintaining nerve health.
